## SUMMARY

Working as a System Developer more than 10 years with experience in analyzing, designing the structure of database and writing a code. I'm skilled back-end developer experienced in Coldfusion, PHP and javascript. I specialize in developing server-side application and database that meet customer expectation. I also have experience to configure a server like IIS to ensure the system can run perfectly. I am a highly analytical back-end developer with SQL expertise. I develop efficient and secure systems that meet client needs. A team player and highly motivated individual and aspired potential leader for a team and able to adapt different work culture and strong problem solving.
